A. GENERAL

1.0 Purpose and Objective

This Service Level Agreement (SLA) has been jointly created by MI Department of Treasury and the Department of Information Technology (DIT) to detail the conditions and expectations of our two organizations regarding the delivery of information technology services.

We believe this SLA will help us express our expectations of each other, manage our respective workloads, communicate more effectively and quickly resolve any service problems that may arise. This document can be viewed as a building block that will contribute to a long-term relationship. Accordingly, no changes will be made to this document without the agreement of both organizations. This document will remain in effect for one fiscal year or until explicitly replaced or terminated.

2.0 Scope

DIT will provide the following services at all MI Department of Treasury locations, either in State or out of State. These services include application development and maintenance, helpdesk services, voice, desktop and field services, computing services, data and network connectivity services, security, disaster recovery and business resumption services, information technology and consulting services, IT procurement and IT contract management. The following services are not provided by DIT and therefore are not part of this agreement; GC Services, Sallie Mae, Title Search, Portfolio Advisors, D.A. Rainsberger (Great Plains accounting software), ACISI, Bank One.

3.0 Roles and Responsibilities

DIT shall:

- Be responsible for providing the resources and skills to deliver the agreed-to services identified in the SLA.
- Communicate the methodology for pricing and the process for collecting fees and payments.
- Organize, facilitate and attend meetings in order to meet service objectives and business demands.
- Commit to teamwork and conflict resolution.

- Ensure the needs and concerns of DIT and the Agency are represented.

MI Department of Treasury shall:

- Assign an individual as the Department SLA Manager.
- Commit to teamwork and conflict resolution.
- Communicate all issues and problems to DIT following the problem management and escalation procedures outlined in this document.
- Communicate with DIT to ensure that DIT is adequately informed about MI Department of Treasury needs, requirements and business directions. The Agency must communicate with DIT immediately if there are changes in program direction. New initiatives must be communicated to DIT so that adequate preparation and procurement time is available to implement new or enhanced services.
- Include appropriate DIT Information Officer (IO) in IT strategic planning activities.

MI Department of Treasury Ownership of MI Department of Treasury Data

Data obtained pursuant to the statutes or rules of programs administered by the MI Department of Treasury residing on computing devices located at Data Center Operations or managed by Distributed Processing Operations staff on remote servers or on desktop workstations operated by Department of Treasury employees is owned by the MI Department of Treasury.

MI Department of Treasury Data is and will remain the property of the Department of Treasury. The DIT in delivering information technology services is acting as the custodian of MI Department of Treasury data. The data owner, i.e. MI Department of Treasury, is responsible for communicating data requirements to the DIT, e.g. access rights, criticality, etc. The DIT will establish and maintain environmental, safety and facility procedures, data security procedures and other safeguards against the destruction, loss, or alteration of MI Department of Treasury Data in the possession of the DIT which are no less rigorous than those maintained by the DIT for its own information of a similar nature. More rigorous data protection measures should be requested and paid for by the MI Department of Treasury.

Responsibility for Application and General Controls

Application Controls apply to individual computer application systems and may include such controls as data origin, input controls, processing controls, output controls, application access controls, application interfaces, audit trail controls, and application documentation. Application Controls consist of mechanisms in place over each separate application (computer system) that helps to ensure authorized data is processed completely, accurately, and reliably. MI Department of Treasury is and will remain responsible for ensuring application controls are in place and functioning properly within their organization.

General controls provide the business and IT functions with a set of encompassing controls that are shared by several agencies/departments or information system functional units, or support underlying functions that one or more applications rely on. General controls commonly include controls over data center operations, system software (not application software), acquisition and maintenance, physical security, OS (Operating System) level security, application systems development maintenance, and overall IT Department administration. These controls apply to all systems, e.g. mainframe, mini-computer, and end-user computing environments. DIT is and will remain responsible for general controls.

Security

MI Department of Treasury and MI Department of Treasury personnel are responsible for complying with DIT IT security policies which can be referenced on DIT's web site www.michigan.gov/dit.

4.0 Contact Information:

The Information Officer will be the primary representative from DIT managing and ensuring service delivery as identified in the SLA.

David Borzenski
7285 Operations Center
Lansing, MI 48913
Desk Phone: (517) 636-0209
Cell Phone: (517) 930-4014
Borzenskid@michigan.gov

In the event that the Information Officer is not available, the Client Service Director should be contacted:

Juan Chapa
7285 Operations Center

Lansing, MI 48913
Desk Phone: (517) 636-5031
Chapaj@michigan.gov

Julie Croll has been identified as the Department's SLA Manager and will be the primary representative for MI Department of Treasury.

Julie Croll
430 West Allegan St.
Lansing, MI 48922
Office Phone: (517) 373-8404
Crollj@michigan.gov

In the event that Treasury's SLA Manager cannot be contacted, Mary MacDowell should be contacted:

Mary MacDowell
430 West Allegan St.
Lansing, MI 48922
Office Phone: (517)
macdowellm@michigan.gov

Customer Service Center (phone 241-9700, email: @michigan.gov)
The DIT Customer Service Center is available 7:30 am – 5:00 pm Monday through Friday. This Customer Service Center is the point of contact for MI Department of Treasury service requests and problems.

5.0 SLA Problem Management and Escalation

It is anticipated that the services provided by DIT will be acceptable to the Department of Treasury. If a service level is not met or a problem with DIT's service is experienced, agency personnel directly involved with the situation should follow the escalation path:

- Client Specialist,
- Client Service Director.

In the event that the Department is still dissatisfied with the services provided the Department SLA manager should contact the DIT IO. The IO will resolve the issue to the Department's satisfaction. If a mutual resolution can not be reached, the issue will be elevated to the Director of the Department of Information Technology.

6.0 SLA Document Change Process

Changes to this agreement may be negotiated based on changing business or service needs or significant variances from service commitments. Requests can be submitted to the IO or the Department's SLA Manager, and they will negotiate the changes. The changes must be agreed to by the Directors, or their designees, of both organizations.

7.0 Maintenance and Distribution of the Agreement

The IO is responsible for maintaining this Agreement and ensuring that changes have been incorporated when appropriate prior to distributions of new versions.

Distribution of copies within the MI Department of Treasury organization is the responsibility of the Department SLA Manager.

8.0 Billing and Invoicing

The DIT services charges will be based on actual costs, which are deemed fully allowable and appropriately assigned or allocated to respective DIT services as required by OMB Circular A-87. DIT will provide client agencies with billing information and the channel for input and feedback through the MI Information Technology Executive Council.

DIT is in a transition period. As a service provider to all State of Michigan agencies, the ultimate direction is to move to a fully-rated cost recovery model. Noted below are cost treatments and charge-back methodologies for DIT services for FY 2004. (DIT expects to rate its DPO services in either FY04 or FY05 and its application development services in FY05.)

Invoices must be paid within 30 days of receipt. If an item is disputed the remaining invoice amount must be paid in full within 30 days of receipt. MI Department of Treasury must notify Corey Sparks of disputed items within 40 30 days of receipt of invoice.

DIT Cost & Cost Recovery Treatments FY 2004

Direct Charges: The MI Department of Treasury will be charged for costs directly associated with the delivery of IT services. Examples include: direct agency assigned staff, including salaries, retirement and fringe benefits, and agency specific IT procurement. In some instances there are staff who are working for multiple agencies in a non-rated service. Program managers will provide work distributions based on time reporting data for staff in these roles.

Staffing costs will be charged to the MI Department of Treasury based on DCDS distribution percentages. DIT will continue to maintain time statistics. Time statistics will be distributed to each Agency on a monthly basis, or as agreed upon by the Agency and DIT. DIT will also provide agencies with additional time statistics detailing, based on each agency's needs, project-level/index code costs.

Specific IT procurements for an agency will be approved by both the agency and DIT. Documentation will accompany each purchase describing what is being purchased and why.

All information technology service and commodity contracts will be administered by the Department of Information Technology. DIT and the agency will mutually agree on the appropriate administrator for those contracts which contain both non-IT and IT deliverables.

Program Administration (PA): Program Administration (which includes divisional, sectional and team administration) expenditures are costs incurred by program management in the delivery of IT services. An example of such cost is the Director of Agency Services. Costs incurred by the Director of Agency Services will be allocated to the MI Department of Treasury as a function of Agency Services' direct salaries charged by Agency. PA will be allocated to the first-line staff through step-down allocations based on salary dollars.

Rated Services: The MI Department of Treasury will continue to be charged for rated services such as Telecommunication data and voice networks, Data Center Services, Project Management and Center for Geographic Information Services, etc. Rated services are charged based on usage for the specific service per published rate schedules.

Desktop Services: Desktop Services costs will ultimately be recovered through a rated structure. Initially, however Desktop costs will be allocated to each agency based on relative ~~percentage~~ the count of desktops.

$$\frac{\text{Desktop Services Total Costs}}{\text{Total Desktop Count}} \times \frac{\text{Agency Desktop Count}}{\text{Total Desktop Count}} = \text{Agency Charge}$$

Where required, Remedy statistics may be used to aid the DIT in further distribution of desktop costs. Desktop counts which serve as the basis for both agency and total counts will be taken on a quarterly basis. (Note: Specific desktop purchases will be charged directly to the MI Department of Treasury and not allocated.) DIT will discount the desktop rate by 25% for unintelligent access devices, such as terminals.

Desktop charge will include the following DIT costs:

Distributed Processing (DP): Distributed Processing services (local networks, servers, email, mainframe operations productions support, etc.) will be charged to the MI Department of Treasury based on direct assignment of staff. DP program administration will be allocated to first-line workers via step-down function based on salary dollars.

Enterprise Portal Costs: Enterprise Portal costs will be allocated to the MI Department of Treasury based on a weighted-average of content pages and page views for internet costs.

Rent: DIT recognizes that there may be instances during transition where DIT staff who are servicing multiple agencies may be housed with an area that heretofore had been dedicated to a single agency. DIT will recommend a method for equitable allocation and "true-up" of these costs for treatment beginning with the FY05 billing cycle.

Annual Reconciliation: DIT will conduct an annual reconciliation of charges, or "true-up." This will involve a comparison of billed charges to the actual costs of providing those services. DIT may elect to refund any difference to customers through a final adjustment to billings. However, if differences are within reasonable levels, they may be carried forward as adjustments to future year's charges or rates as provided in OMB Circular A-87. DIT will provide all "true-up" documentation so that both the agency and DIT can meet year-end, book-closing dates established by the Office of Financial Management.

Meetings: DIT financial staff, in coordination with the MI Department of Treasury's Information Officer, will meet on a regular monthly basis with MI Department of Treasury staff to review DIT invoices (invoices typically presented on a monthly basis) and identify and resolve any billing adjustments, omissions and related issues that may be identified.

Spending Plan: DIT financial staff will prepare and distribute a spending plan each month that annualizes expenditures, year-to-date, against the

Agency Inter Departmental Grant. DIT financial staff, in coordination with the MI Department of Treasury's IO, will meet on a regular quarterly basis with MI Department of Treasury SLA Manager and delegated staff to review the spending plan, identify funding shortages, and jointly prepare an action plan to spend within available resources.

9.0 Audit Clause

As part of this SLA, the MI Department of Treasury and DIT agree to this audit clause which provides that financial records, documents, data, accounting procedures and practices, programs, projects, information systems, or any other items of the service provided, deemed relevant to the SLA by MI Department of Treasury and DIT, are subject to examination by the appropriate MI Department of Treasury and DIT representatives. The MI Department of Treasury and DIT will, and will cause its subcontractors and suppliers to, provide to the MI Department of Treasury and DIT (and internal and external auditors, inspectors, regulators and other representatives that the MI Department of Treasury and DIT may designate from time to time) access at reasonable hours to the MI Department of Treasury and DIT personnel, to the facilities at or from which services are then being provided and to the MI Department of Treasury and DIT records and other pertinent information, all to the extent relevant to the services and MI Department of Treasury DIT's obligation. Such access will be provided for the purpose of performing audits and inspections. The MI Department of Treasury and DIT will provide any reasonable assistance requested by either party or their designee in conducting any such audit, including installing and operating audit software.

Following an audit, the MI Department of Treasury and DIT will conduct an exit conference with MI Department of Treasury and DIT representatives. The MI Department of Treasury and DIT will meet to review each audit report promptly after the issuance thereof and the MI Department of Treasury and DIT will respond to each audit report in writing within thirty (30) days from receipt of such report, unless a shorter response time is specified in such report. The MI Department of Treasury and DIT will develop and agree upon an action plan to promptly address and resolve any deficiencies, concerns, and/or recommendations in such audit report and the MI Department of Treasury and DIT will undertake remedial action in accordance with such action plan and the dates specified therein.

10.0 Service Reviews

Quarterly (or as needed) reviews will be conducted with the Department's SLA Manager to assess service effectiveness, address service problems, and evaluate service delivery in light of business needs and available

resources. Particular attention will be paid to notable deviations from commitments.

As a basis for the review, the IO and Department SLA Manager will collaborate in collecting, analyzing and reporting service data associated with the SLA. A report describing project statuses, issues addressed, decisions made and actions taken will be published within five (5) days of the review meeting.

This review will also include advice from DIT on technology options that have become available that could improve the overall level of service. This review will also serve as an opportunity to identify improvements in performance.

B. AGENCY SUPPORT SERVICES

1.0 New Systems Development

Application development requests will be submitted through the process developed by the MI Department of Treasury and the IO. Agency responsibilities will minimally include:

- Development of the Project Feasibility document (or equivalent) which shall describe the general business problem being solved. This document must include Agency authorized signatures and funding source.
- Prior to proceeding with the project, the Agency, with assistance from DIT, shall be responsible for developing the project charter as described in the Project Management Book of Knowledge (PMBOK)-based, project management methodology standards. This document must identify:
 - Project scope.
 - DIT and Agency Roles and responsibilities.
 - Project management and project ownership.
- Where DIT resource (staffing) conflicts exist, the Agency with DIT will either ~~must~~ re-prioritize current projects and current maintenance efforts or identify alternative resources to accommodate new system development.

2.0 Application Maintenance and Support

Enhancement and maintenance requests will be submitted through the process developed by the MI Department of Treasury and the IO. Application maintenance and support includes the following:

Enhancement sub-divided as follows:

- **Major Enhancement:** involves significant new requirements, but does not alter the overall makeup of an existing solution. This may entail adding, changing or deleting functions for the existing solution. Major enhancements will usually cause an impact to the business, organization or architecture and may require significant cost, effort, and time to complete. Examples may include migration to a new application platform, adding new interfaces, or re-designing a database.
- **Minor Enhancements:** involves adding new requirements against an existing solution, but have minimal impact on the business, organization, or architecture. Examples may include updates to data tables, updating a field on an HTML view, or updating a module that was originally changed via an emergency fix.
- **Perfective Maintenance:** involves work that is initiated in order to avert foreseeable problems, improve performance, quality, reliability, efficiency, usability, or maintainability of an installed solution. Examples may be new reports or changes to existing reports.

Maintenance sub-divided as follows:

- **Corrective Maintenance:** includes work that is initially spawned by a problem incident report and is generally referred to as a "fix." Involves changes made to application code in support of new or changed system software. Cost and effort are relatively low. This work may be initiated to provide a complete fix after an emergency fix was performed.
- **Emergency Fix:** defined as the occurrence of a problem that must be addressed immediately, such as the disruption of a system or application.

Urgent – life and death situations.

High – public impact, significantly impacts a large number of users, or inability to meet deadlines for statutory payments.

Medium – all other situations that have impact on users.

DIT will be responsible for on-going system maintenance, ~~unless~~ otherwise whether or not maintenance is outsourced to a vendor, for the duration of this agreement. Should system maintenance obligations impact the delivery of new systems, or resources not available within the existing staffing structure, the Agency will be responsible for prioritizing maintenance efforts.

Production problems identified by agency users will be reported to DIT through the Client Service Center and recorded in its Remedy ticket-tracking software. Both DIT Agency Services staff and agency staff will have access to the ticket-tracking, Remedy software for the most current status of repairs.

C. CRITICAL APPLICATIONS

The following applications are considered critical to the agency, and detailed service level agreements are included in **Appendix A**:

- Investment Accounting
- Receipting of Revenue
- Disbursement of Funds
- Revenue Sharing

D. DISTRIBUTED PROCESSING OPERATIONS

1.0 Overview

The Distributed Processing Operations (DPO) Division within the DIT is responsible for the planning, design, engineering and operations of all local area networks for the Michigan Department of Treasury. DPO also offers server and application hosting services, e-mail service, file and print services, operating system support, maintenance support, software and hardware technology refreshment services in a variety of different facilities in a distributed environment.

DPO services are typically provided on a 5 X 42 10 basis. 7:00 a.m. – 5:00 p.m.; however, the Agency has the option to extend coverage via an on-call service. On-call service must be specifically requested by the agency. "On-call" service will ensure that first acknowledgement of a reported problem will be made within 20 minutes. The personnel cost of "on-call" service will adhere to the rules and

regulations established in the Compensation Manual published annually by the Michigan Department of Civil Service.

DPO also offers mainframe job scheduling, operations and data entry services.

2.0 DPO Services

DPO provides the following types of services to Agencies:

Facilities Management	Network Management
Server Procurement	Job Scheduling/Execution
Server Software Installation	Maintenance Agreements (SW & HW)
Asset/Configuration Management	Server / HW Capacity Planning
Server Installation/Setup	Service Request Management
Server Backup/Recovery	Software Problem Management/Patch Process
Server Documentation	Print Services
Server Security	Operations
User Profile Management	Metrics/Utilization Reporting
Performance Tuning	Application Server Support
Server Monitoring and Corrective Action	Server Software Distribution
Server Monitoring and Corrective Action	Change Control
	Software Version Control

Service levels for each DIT service center will be established...

3.0 DPO Monthly Costs

DPO charges for FY04 are costs directly associated with the delivery of the services listed above. These charges include three types of costs: Payroll, Program Administration, and Support Costs.

- **Payroll** consists of actual payroll charges, including retirement and fringe costs, for the pay periods ending during the invoice month. DPO staff is charged to an agency as dedicated to the agency, allocated to the agency, or based on a time distribution.
- **Dedicated:** Costs of DPO employees working full-time for a single agency.
- **Allocated:** Costs of supervisors and managers are allocated based on salary costs of employees in their reporting organization.

- **Time Distribution:** Some DPO employees provide services to multiple agencies. For these employees, their costs are distributed as a percentage of time worked for each agency.
- **Program Administration (PA)** expenditures are costs incurred by program management in the delivery of DPO services. An example of such cost is the Director of Distributed Processing Operations. Costs incurred by the Director of Distributed Processing Operations are allocated to agencies as a function of Agency Services' direct salaries.
- **Support** costs are expenditures such as travel, telephones, pagers, copier rental, office supplies, and other CSS&M related to the staff in the DPO organization.

E. IT PROCUREMENT

1.0 Overview

DIT Contract Management Services is responsible for processing all primarily IT-related contractual service requests and those contracts having an IT component mutually agreed upon with the Department of Treasury, and ensures that the services provided meet contract specifications. In serving these IT needs, DIT Contract Management Services include the following:

2.0 Contract Management Services

DIT Contract Management Services is responsible for processing all IT related contractual service requests, and ensures that the services provided meet contract specifications. In serving these IT needs, DIT Contract Management Services include the following:

- Assist Agency in developing, renewing, and re-bundling IT contracts.
- Work with Agency and project managers in identifying IT needs and developing IT statements of work.
- Coordinate with DMB to determine most appropriate contract vehicle to obtain services.
- Develop contract language for Request for Proposal, Invitation to Bid, and Sole Source contracts.
- Work with Agency procurement and personnel staff to obtain Department of Civil Service approval, via CS-138, if needed.

- Participate in pre-bid meetings, oral presentations, and joint evaluation committee process and vendor selection.
- Review and, if necessary, help guide the development of the contractor's detailed work plan to ensure it will result in meeting the objectives and tasks stated in the contract.
- Act as liaison between Agency and Contractor in order to arrive at a mutual understanding of the respective roles and responsibilities of the contractor and the Agency.
- Prepare contract portfolio and status reports to share with management staff regarding contract management and activity.
- Monitor contracts with existing vendors and make recommendations on extensions and renewals using uniform analysis.
- Manage contract change requests.
- Monitor financial data for each contract to ensure that contract is on budget.
- Monitor all contract activity to ensure compliance with contractual obligations and DIT's IT strategic direction.
- Leverage resources and create cost savings by establishing contracts using a best-practice, best-price, and best-value mindset.
- Promote proactive management of the IT contract portfolio through valued partnership and foster an enterprise-wide perspective.
- Coordinate funding approvals.
- Adhere to Executive Directives/Executive Orders, DIT and Agency-specific requirements in processing IT contractual service requests.
- Process approved agency contractual service requests in a timely and efficient manner to meet the business needs of the agency.

3.0 Procurement Services

DIT Procurement Services covers the purchase of all non-delegated IT commodities and services for Treasury agencies.

The DIT Procurement Services Section performs all MAIN-related functions for IT procurements. These include requisitions, purchase orders, change orders, receivers, and cancellations. DIT Procurement Services will issue Agency-specific procurement requisitions in a designated MAIN ADPICS department number and route those documents for view and approval by the Agency, based on approval path

information provided by the Agency. DIT Procurement Services will notify end users of request status throughout the procurement.

In serving the IT procurement needs of the Agency, DIT Procurement Services will:

- Adhere to Agency-specified approval requirements for IT purchases;
- Provide a variety of methods for Agencies to request the purchase of desktop commodities, including telephone requests, e-mail, fax, ID-mail requests to the Client Service Center;
- Process approved Agency procurement requests through appropriate DIT approvers in a timely and efficient manner to meet the business needs of the agency.;
- Check published on-hand stock status for items that can be redeployed free of charge before procuring new items using Agency funds;
- Procure commodities that meet published enterprise IT standards as developed and maintained by DIT's Office of Strategic Planning;
- Use a variety of procurement methods, including the MAIN system and procurement cards, to purchase items at the most favorable cost and value;
- Notify the Agency of procurement request status;
- If requested, use Agency-specific coding in selected fields of MAIN coding blocks to assist the Agency in reconciling its monthly invoice;
- Establish and maintain a MAIN ADPICS department approval path to route Agency-specific purchases for approval and viewing by Agency staff;
- Work with the central equipment and parts depot to perform the receiving function for commodity purchases;
- Adhere to Treasury Executive Directives and instructional memoranda regarding the approval, processing, and reporting of IT commodities;
- Expedite orders as quickly as administratively possible for urgent Agency requests;

- Coordinate procurement efforts with those of DIT Infrastructure Services, Agency Services, and Administrative Services to streamline receipt, delivery, and billing for commodities;
- Provide procurement contact names and instructional media to Agency staff regarding DIT procurement methods. If requested, meet with and train Agency staff on DIT procurement processes;
- Work cooperatively with DIT Infrastructure Services to maintain warranty and maintenance agreements for software and hardware serving the Agency;
- Strive to lower Agency costs for licensing and maintenance purchases by combining procurements for volume discounts;
- Work proactively with DMB Accounts Payable staff to process assigned invoices and ensure accurate payment of vendor invoices in a timely manner to meet the business needs of the agency.

The Agency will be responsible to:

- Enter Account Code (AC3) information into requisitions in the approval path, if the Agency chooses to request AC3 coding for its IT purchases;
- For IT desktop commodity purchases, supply information identifying the end user's name, phone number, and physical location to assist in notification, delivery, installation, and inventory tracking;
- Provide Agency-specific ADPICS department number and level number for inclusion in the DIT approval path;
- Provide DIT Procurement with current information on Agency-designated signatories and approvers for DIT-0015 (Procurement Request) documents and Client Service Center Procurement requests;
- Indicate whether funding for each procurement request is included in the IDG. If non-IDG, provide a specific agency index code.
- Comply with the requirements of the End User Computing freeze on desktop commodities by providing a business case for any desktop commodity request that includes some portion of general fund monies.

Charges to the Agency for Procurement Staff will be based on the percentage of transactions processed for the Agency by its designated procurement liaison(s)

and related percentage of the supervisor and overhead costs. Remedy statistics may be used to calculate number of transactions processed for the Agency.

F. SECURITY SERVICES

1.0 Security Services Overview

Security Services cover the development, maintenance, implementation, and enforcement of security-related policies and procedures for State Government IT resources.

It also includes incident management, monitoring, and interaction with non-State of Michigan security entities to insure that the State's IT infrastructure is safe from entities outside State Government as well as within State Government.

2.0 Scope

- Development of security-related policy and procedures.
- Coordination, implementation, and enforcement of all related security policies.
- Monitoring of security processes.

3.0 Security Services

Security Awareness and Assessment

Essential Base Services:

Development of Security Guidelines and Standards

1. Development of guidelines and standards to meet State and federal security obligations and needs.
2. Coordination of DIT Security agreement processes with agencies.
3. Provide security-related tools, such as training material, etc.
4. Research new security technologies and make recommendations for new processes.

Premium Services:

1. Coordination of Security with agencies, including awareness promotion: Work with agencies to promote security awareness.
2. Enterprise Risk Assessment: Conduct enterprise-wide Rapid Risk Assessment.
3. Assessment & Management of Application Risk:
 - A. Assessment of application risk: Assist agencies in evaluating degree of security-related risk.
 - B. Development of mitigation plans: Provide assistance to customers toward development of mitigation plans to address identified risks.

Passive Monitoring of IT Security Environment

Essential Base Service:

Monitoring of Treasury Firewalls

1. Provide oversight responsibility for the security of the State's infrastructure.
2. Provide final approval on firewall rule changes in accordance with State Standards and guidelines.

Provide Security Alert Services

1. Monitor, evaluate and publish industry security events and vulnerabilities to Agencies.
2. Provide network intrusion detection.
3. Monitor security breaches and provide information to agencies as warranted.

Hardware Security Scanning Services

1. Coordinate scanning of systems within SOM for possible vulnerabilities.
2. Provide recommendations to resolve known vulnerabilities.

Virus Protection

1. Coordination of virus protection, detection and suppression at the PC, server and network level.

General Security Monitoring

1. Provide reports to agencies on security violations as well as policy infractions.
2. Provide IDS services on DIT supported platforms.
3. Coordinating application of federal security programs, such as Homeland Security (focused on "all threats" approach).

Active Monitoring of IT Security Environment

Essential Base Service:

Perform IT Risk Assessment Services

1. Perform risk assessment of DIT infrastructure facilities in accordance with Treasury policy and standards.
2. Perform on-demand risk assessment service, as needed within DIT for new or changing infrastructure facilities.
3. Document risk assessments for management review and response.

Audits of Access Privileges

1. Audit access codes and usage on platforms within DIT based on Security policies and standards.
2. Provide information for coordination with customers on customer access rights and privileges.
3. Assist customers with agency audits relating to IT platforms/applications. This assistance may involve IRS audits, Auditor General Audits, etc.

Premium Services:

1. Ethical Hacking - Conduct ethical hacking against DIT platform resources to assist in determining level of risk for intrusion, firewall protection and make recommendations on remediation strategies.

2. User Monitoring - On-demand monitoring of users. In specific circumstances, it may be necessary to monitor specific users to address suspected illicit or fraudulent use of IT resources.
3. Health Information Portability Protection Act (HIPPA) - Ensure compliance with HIPPA regulations.
4. Security Accreditation of Computer Systems - Facilitate security accreditation and certification of computer systems.
5. Formal Security Training / Awareness.
6. Homeland Security Incident Coordination Issues/Response.

Coordination of Physical Security for DIT Facilities

Essential Base Service:

1. Provide oversight responsibility for the security of the Treasury's physical IT infrastructure.

4.0 Disaster Recovery Services Overview

The Disaster Recovery and Emergency Management Services addresses DIT's responsibility regarding planning, developing and executing disaster recovery capabilities.

These services also address offering assistance to the agency toward development of their business resumption plan responsibility. DIT can leverage its disaster recovery planning expertise to provide assistance to its plans and processes. While both the development and execution of business resumption is clearly an agency responsibility, DIT will assist customers in dealing with this responsibility.

5.0 Scope

- Assist in the creation of disaster recovery plans and processes and creation and maintenance of a disaster recovery hardware environment.
- Bring hardware and systems back online in the event of a disaster for critical application infrastructure.
- Assist toward development of business resumption plans and processes.

6.0 Disaster Recovery Services

Development and Maintenance of Disaster Recovery Plan

Essential Base Service:

Maintenance of Disaster Recovery Plan - For critical business and DIT processes, creation of a disaster recovery plan covering:

1. Maintenance of existing disaster recovery plans.
2. Distribution of the disaster recovery plan.

Premium Services:

A. Development of Disaster Recovery Plans - For critical business and DIT processes, creation of a disaster recovery plan covering:

1. Development of disaster recovery plans specific to each platform/process.
2. Distribution of the disaster recovery plan.

Testing of Disaster Recovery Plan

Essential Base Service:

Testing of Disaster Recovery Plan - Coordination of testing process with DIT infrastructure support and customer as required. This includes:

1. Testing of applications, network availability and output.
2. Ensuring that adequate Disaster Recovery testing is accomplished to meet customers' business requirements.

Premium Services:

- A. "Table-Top" Testing - Panel review of Disaster Recovery Plan to verify plan validity (content, information, sequence, etc.).
- B. Simulation Testing - Full-blown simulation of Disaster Recovery Plan execution to verify validity, completeness and effectiveness.

Execution of Disaster Recovery Plan

Essential Base Service: None.

Premium Services:

- A. Declaration of an EMERGENCY - Based on customer need and circumstance, DIT is responsible for the declaration of an emergency.
1. Provides 'over and above' normal business response for the specific systems or applications for which the emergency has been declared.
 2. Escalation to 7 X 24 coverage from on-call individuals.
- B. Declaration of a DISASTER - Based on customer need and circumstance, DIT is responsible for the declaration of a disaster. [NEED TO SUMMARIZE CIRCUMSTANCES THAT WOULD CREATE A DISASTER AS WELL AS DEFINE DISASTER]
- C. Execution of Disaster Recovery Plans and Processes - Carry out efforts necessary to implement a Disaster Recovery effort based on the requirements defined in the Disaster Recovery plan to ensure that the DIT Services meets pre-defined Agency Business Resumption Process requirements (may include the desktop, telecom, and distributed server environments).
1. Re-establishment of infrastructure required to support business resumption.
 2. Re-establishment of data access.

Assistance toward Development of Business Resumption Plans and Processes

Essential Base Service:

- Assistance to agencies toward development of their business resumption plans and processes.
- Coordination of business resumption planning process with DIT Infrastructure support, Agency Services and Customer as required.
- Ensure that all infrastructure issues identified in the Business Resumption Process as being critical are involved in the development process (may include the desktop, telecom, and distributed server environments).

Other Disaster Recovery Services

Essential Base Service:

All other disaster recovery and assistance toward development of business resumption processes.

G. ENTERPRISE APPLICATION SERVICES

1.0 Overview

Enterprise Application Services provides application development and support for technical applications and services impacting several agencies and the enterprise (all agencies), including Human Resource Management Network (HRMN), DCDS, ADPICS, RSTARS, Michigan.gov, e-stores, Vignette, and Senior Project Management.

2.0 Development and Enhancement Services

Development and enhancement services to the Human Resource Management and Finance applications including HRMN and DCDS are prioritized by the Civil Service Department. MAIN (ADPICS and RSTARS) services are prioritized by the Office of Financial Management.

New Development projects and enhancements to enterprise or multiple agency solutions including Michigan.gov applications are provided upon request by agencies.

Billing and Funding

HRMN and DCDS are funded by the Civil Service Department; MAIN is funded by the Office of Financial Management of the Department of Management and Budget. Development and enhancement services are billed based on the scope of work requested and funding available by the requesting agency.

The billing rate will be an hourly rate for staff based on expertise:

- Project Manager
- Jr. Project Manager/Special Projects Lead
- Sr. Technical Analyst
- Analyst/CMA Specialist

Obtaining Services

A Memorandum of Understanding identifying the rates, work to be performed, responsibilities and funding source and approval will be developed and signed by the Information Officer, the Director of Enterprise Application Services or designee, the Requestor for each project and the SLA Manager.

3.0 Michigan.gov

The Michigan.gov portal group provides hosting services including the production server environment and support at a 99.9% availability, and a test server, licenses and support.

Support Services for Michigan.gov include:

- Formal training and expertise in Vignette to all end users.
- Technical expertise in Vignette, Surfaid and Inktomi for all technical resources.
- Graphical User Interface Michigan.gov Standard support (banner and graphics).
- Treasury of Michigan web application monitoring and review for consistency in security, privacy, look and feel, usability.
- Routine and on-request statistical reports.
- Web user interface design expertise and support of the user interface look and feel of the portal.
- Vignette Application maintenance and small enhancements.
- Maintain the contact Michigan e-mail box and either answer the e-mails or redirect them to the agency or office that can best reply to the query.
- Support Governor's Executive Office and Communication Division with ongoing support for the Michigan.gov home page.

Billing and Funding:

Michigan.gov Portal charges must support entirely the cost of the production and test hosting environments (now 88% of the cost) and the support services staff (now 12% of the cost). Total estimated annual expenses for the Michigan.gov portal is \$4,081,000 \$ x distributed as follows:

Production and test hosting charges:	\$3,586,000 y
Support Services Staff:	\$—495,000 z

Total estimated charges for MI Department of Treasury for October 1, 2003 through September 30, 2004 can be found in Appendix C. ~~are [insert appropriate amount]~~

Agency charges are based on two factors – each weighted at 50%. These factors will be reviewed and adjusted annually:

- Content count in Michigan.gov Database on 10/25/02 a date in September 2003 are representative of the cost of those servers, redundancy and support and the Vignette application.
- Page Views (end user traffic) 9/1/02 through 9/30/02 10/01/2002 through 9/30/2003 are representative of the cost of servers and support for Michigan.gov response time, availability and redundancy.
- An agency's 2004 charge will not increase or decrease by more than 10% from its 2003 charge.

Charges are not based on the number of websites per agency, the number of authors, editors or publishers, or the number of training or support services.

Obtaining Services:

Enterprise Application Services supports Michigan.gov customers in several different ways:

- Content Management Administrator (CMA) Training is provided on a regular schedule or, if needed, special training can be coordinated to ensure that agencies have personnel capable of maintaining the agencies' web sites with current information. Training can be scheduled by going to <http://w3.michigan.gov/emichigan> clicking on CMA and then Training.
- Assistance on CMA problems.
- Requests for URL redirects.
- Maintain the contact Michigan e-mail box and either answer the e-mails or redirect them to the agency or office that can best reply to the query.

For assistance and any of these items, send a GroupWise e-mail to DIT-EAMS-Web. For immediate assistance from 8:00 AM to 5:00 PM, you can page a CMA expert by calling 341-0999 and leaving your phone number. Agency personnel should report problems and/or outages to the DIT Client Service Center, 241-9700.

Senior Project Manager Services:

The Senior Project Manager is responsible for the successful on-time, within budget and scope, delivery of large (\$5,000,000+), complex and strategic Treasury of Michigan projects. They are seasoned and experienced project managers responsible for successful delivery along with providing mentoring and development of Project Management as a discipline within the Treasury of Michigan.

The billing rate for senior project managers can be found in Appendix C. is \$95 per hour for fiscal year 2003.

Obtaining Services:

Contact your IO or Teresa Douglass at 517-241-5779.

H. DESKTOP SERVICES

1.0 Overview

This section details the services associated with the availability of 'ready-to-use' workstations, including standard or advanced workstations as well as associated peripherals, standard software and applications.

It also covers the activities required to ensure that the workstations, peripherals, software and applications provided are properly supported through their entire lifecycle.

2.0 Roles and Responsibilities

Desktop Services include:

- Availability of workstation & standard software, including standard configuration, software and basic office productivity and State of Michigan software and applications;
- Availability of non-standard software, in answer to specific agency, position or in some case individual needs;
- Model Office service, which ensures that any new application, software or hardware is 100% compatible with existing standards & equipment;
- Moves, Adds and Changes service, which deals with the installations, moving and/or removal of workstations and peripherals;
- Peripheral support, covers the on-site support for standard peripheral equipment;

- Kiosk support, similar to peripheral support but tailored specifically to the kiosks used by the agencies to provide services across the Treasury.

3.0 Client Service Center

As its name implies, Client Service Center essentially provides a portal to all DIT-related service areas via an Enterprise and Centralized Help Desk.

The Client Service Center covers the following:

- Single point of contact for any form of user support: (to obtain 'break & fix' support, to obtain information about DIT services, to procure new services from DIT such as applications hosting, etc.);
- Tier 1 user support with a stated goal of resolving the majority of support requests during the initial call ("on the spot");
- Tier 2 user support, when applicable, by drawing on other DIT services or Agency programs for final resolution of the issue.

4.0 Billing

The rate charged to agencies for the maintenance of each desktop device includes:

- Staff providing Desktop Services:
 - State and contractor staff providing the following services: Client Service Center, Field Services, Integration and Implementation (Model Office, Depot, Technical Training, Remedy Support) and 25% of Service Delivery (Infrastructure Specialist) provided to the Agencies and Departments
- Central Remedy Help Desk System and Servers that supports the Client Service Center*
- Enterprise Desktop Software: *
 - Remedy Help Desk Software, Remote Control and Imaging Software and Virus Protection software
- Monthly Client Surveys on closed Remedy cases with results provided to the Information Officers for the Agencies and Departments
- Standard Reports and Metrics provided to the Information Officers/Agencies

- Inventory information of purchased, salvaged and stored equipment at Depot
- Charge on active desktop and laptop computers only
- Workstation counts adjusted quarterly based on salvaged and new purchased equipment until an asset management system is in place
- Storage space of up to 3% of the active workstation counts at the Depot facility
- IMAC (Installs, Moves, Adds and Changes) that do not exceed the staffing levels of Field Services
- CITRIX workstations will have a 25% reduction in the desktop rate
- Shipping and Handling cost related to refurbished and salvages equipment *
- Salvaged desktop equipment and parts in place of new equipment *

Not included in the rates for FY04 but direct charged to the agency include:

- Purchases of Desktop equipment
- Equipment parts to repair equipment out of warranty
- Maintenance contracts on equipment out of warranty
- Dedicated staff to the Agencies and Departments with no reduction in the desktop counts
- Agency and Department specific application and packaged software
- Contractor and other related cost due to special projects that exceed the desktop staffing levels
- Storage of equipment over the 3% standard storage rate

I. CENTER FOR GEOGRAPHIC INFORMATION (CGI)

1.0 Overview

The Center for Geographic Information (CGI) provides leadership, technical expertise, and policy for the development, use, dissemination, promotion and sharing of the Treasury's geographic resources. Charges for CGI fall into two (2) categories: direct agency charges and services charged on an hourly basis.

2.0 Services

New development projects and enhancements to enterprise or multiple agency solutions are provided upon request by agencies. These services are billed based on the scope of work requested and funding available by the requesting agency. A Memorandum of Understanding identifying the rates, work to be performed, responsibilities and funding source and approval will be developed and signed by the IO, the Director of the CGI, and the requesting agency. The billing rate can be found in Appendix C. ~~will be an hourly rate for staff as follows:~~

Senior Staff:	\$75 per hour
Junior Staff:	\$60 per hour
Support Staff:	\$35 per hour

Selected Services Include:

Internet Mapping Services

Thinking and working geographically provides the advantages of using maps for decision support. Internet Mapping Services provide web tools to create maps, integrate information, visualize scenarios, present powerful ideas, and develop effective solutions. Geographic Information Systems (GIS) on the Internet provides a much more dynamic tool than a static map display. Web-enabled GIS delivers interactive query capabilities such as

- Searching for specific site locations
- Displaying and viewing multiple data sets
- Conducting queries for specialized analysis
- Retrieving specialized data services

The CGI provides web-specific data development and management services targeting cartographic design and map rendering technologies;

Internet Mapping Application development using pre-developed functionality or meeting new, agency-specific requirements; and IMS hosting services that include G-IT hardware and software maintenance with application versioning upgrades available.

3.0 Project Management

Geographic Information Technology (G-IT) encompasses an understanding of spatial data, cartographic expertise, a specifically targeted family of software and its supporting architecture. Since 80% of Treasury government information has a spatial component, the CGI offers agencies its G-IT expertise for reviewing proposals containing a geographic component and continuing project management services to ensure successful vendor delivery of G-IT requirements.

G-IT User Support

The CGI is committed to supporting and enabling Geographic Information software and equipment users. Both formal and informal assistance and training is available for Geographic Information off-the-shelf software, G-IT equipment such as GPS units, and user training for developed applications. Cartography-related services include custom mapping, development of both standard and custom symbol sets, and standard mapping templates and layers. CGI also provides GIS analysis services tailored to meet agency needs or assists agencies in developing and implementing their own GIS analysis.

Spatial Data Management

The CGI realizes the growing need for managing the ever-increasing volume of Treasury geographic data and offers services to develop data standards for geospatial metadata, locational referencing (examples include address, Public Land Survey System, linear referencing systems, digital orthophotography, Global Positioning Systems [GPS] and other referencing systems), and web portal standards for the Michigan Geographic Data Library. Standards are designed to leverage data integration and sharing among Treasury agencies. Assistance is available for using, administering, and optimizing SDE (Spatial Data Engine) for data loading, data access, and increased performance. Modeling and design services provide yet another avenue to improve data access and availability.

Product Development, Data Development and Data Integration

CGI provides the following services, including

- 1) Standard and custom map products;
- 2) Large-format printing for press conferences, court exhibits, and presentations;
- 3) Database queries and tabular report compilation that reference geospatial data;
- 4) Address (and other locational data) cleansing and address matching/geocoding services;
- 5) Geospatial and related data conversion and migration;
- 6) Custom geographic data development;
- 7) Referencing system and map projection conversions; and
- 8) Two-way data integration between the Michigan Geographic Framework and various business data sources.

CGI also coordinates digital imagery acquisition and development. The CGI administers the Treasury's geographic information web portal including maintenance of the Michigan Geographic Data Library providing access to several Treasury agency-sponsored datasets.

Michigan Geographic Framework

CGI serves as administrator of the "Michigan Geographic Framework". The Geographic Framework is a standardized infrastructure on which all GIS users of 1:12,000 scale map data can build their applications. CGI serves Treasury, regional, county, and local government agencies, private businesses, and the general public. CGI provides technical assistance and consultation services to Michigan's GIS user community.

(If appropriate, MI Department of Treasury is a contributing partner for FY03 and has committed (insert dollar amount).)

Service Request Process

Contact your IO or Eric Swanson at 517-373-7910.

J. DATA CENTER OPERATIONS

1.0 Overview

Data and Application Hosting is the ability to provide mainframe/server facilities, Operating System support, maintenance and operational monitoring of customer data and applications.

2.0 Data and Application Hosting

Data and application hosting can be performed either in a centralized or distributed environment, depending on the criticality of the data or applications hosted:

- Centralized hosting in a 7x24x365 data center is provided for data and those applications requiring high availability and/or a need for disaster recovery capabilities. It can also be preferred when a selected application resides on a mainframe or server supported by the data center.

K. TELECOMMUNICATIONS

1.0 Overview

Telecommunications involves traditional voice (telephony) and data network backbone connectivity between State of Michigan work locations.

Voice Services addresses all services related to telephony, from basic office and cellular telephony to the design and deployment of elaborate Interactive Voice Response systems (IVR), Enhanced Call Processing (ECP), or Call Centers.

The breadth of Voice Services offered depends directly on the degree of involvement that DIT has in its delivery, i.e. whether or not the delivery facilities are managed by DIT rather than by an external service provider.

2.0 Service Levels

This translates into three (3) different levels in the breadth of Voice Services that are available to customers:

- For most central locations, or locations with a strong concentration of State of Michigan operations (specific buildings within the **Lansing, Saginaw, Grand Rapids** and **Detroit** areas), DIT manages the voice installations and is accordingly able to offer its full breadth of Voice Services.

- For other locations with significant population or concentration of State of Michigan operations (specific buildings within **Flint, Jackson** and **Kalamazoo** areas), DIT is able to offer a limited breadth of Voice Services.
- For all other locations, the role of DIT is currently limited to negotiating agreements with service providers to deliver the services on behalf of DIT.

Data & Network Connectivity covers the connectivity of users to standard State of Michigan data sources and applications such as data center applications, distributed applications and external partners.

The Data & Network Connectivity Services are divided into the following services:

- Connection of a local network to the Treasury of Michigan "backbone," which provides all users of this local network with access to the different data sources described above;
- Different remote connectivity modes, through which users working remotely are able to access their normal data resources;
- Different network services such as dedicated connectivity, connection to external partners, etc.

Appendix A

Application Service Level Detail

System Name: State Revenue Sharing
Effective Date: 10/01/03

Customer: Office of Revenue and Tax Analysis

Technology Owner: Juan Chapa, Agency Services

1) Maintain Current System	Support
a. Maintain Current Functionality	I
b. Contingency Management and System Recovery	I
c. Problem Resolution	I
d. Holiday Processing	I
e. Year Changes	N/I
f. Change Control	N/I
2) Application Support Services	
a. Application Operations	I
b. Historical Recurring Changes	N/I
c. Ad hoc Web Maintenance	I
d. Special Distribution of Output	I

Appendix A

System Description

The purpose of this System is to provide funds for the operations of local units of government distributed based on statute, MCL...

1) Maintain Current System

The following Services are required by DIT to maintain System integrity and the current level of service:

- Application Development
- Distributed Processing Operations
- Data Center Operations
- MI Government Portal
- MI Administrative Information Network

1-a. Maintain Current Functionality

DIT will maintain the System functions in place as of the effective date of this SLA. This service ensures the correct operation of the System. DIT will notify the customer that a System change or System maintenance schedules are ready for implementation based upon the customer's time frame.

Major Functional Activities:

-
-

Processing Modes:

-
-

On-line Inputs:

-

Processing Inputs:

-
-

Processing Outputs:

-

Reports:

Daily: (x)

-

Weekly: (x)

-

-

Appendix A

1-h. Contingency Management and System Recovery

DIT is responsible for providing a backup and recovery method for this application based on the following customer requirements:

1-c. Problem Resolution

DIT will provide xx hour per day, xxx days per year abend resolution; resolution of data integrity problems will be communicated by DIT to the Agency if any other deliverable will be affected.

Response time measure:

Abends

Report delivery--

System performance--

1-d. Holiday Processing

DIT will make changes to enable the System to continue with current functions while adjusting to the Agency holiday work schedule.

1-e. Year Changes

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process.

1-f. Change Control

Not Included (N/I) - Any changes requested or required to the system must follow the normal development process.

Appendix A

2) Application Support Services

Application Development and Maintenance Services cover the entire application lifecycle from a total cost of ownership perspective.

This service offering also addresses the opportunity evaluations necessary to decide whether or not an application development project is warranted.

Application Support

2-a. Application Operations

DIT will provide System support for the current on-line and batch operations.

Online Detail:

4-d. System End-User Help Desk Support

The initial contact for support of this application will be through the DIT Client Service Center.

Glossary of Terms

-A-

Access Privileges	Physical and remote access to DIT facilities and resources granted by Enterprise Security.
-------------------	--

-B-

Business Resumption Plan (BRP)	The documentation that delineates for the Client and DIT the necessary procedures to successfully move the Client's applications from a production facility to the Disaster Recovery Site.
--------------------------------	--

-C-

Change Order	The process of documenting a change which is a deviation from an original request for the purposes of evaluation, approval or rejection, scheduling and tracking.
Client	The term by which DIT will refer to the Treasury agencies that DIT supports, emphasizing the long-term service relationship.
Client Service Center (CSC)	An organizational unit that will manage all requests for clients. This is the initial point of contact for DIT service requests.

-D-

Dedicated Services	Those services which are utilized by a single agency.
Disaster Recovery Plan	The documentation that delineates all the roles and responsibilities for DIT staff, along with the steps that must be taken to successfully move the production processing performed at the DIT managed facilities to the Disaster Recovery site.

-E-

Enterprise Services	Those services which are utilized by multiple agencies.
Escalation	Engagement of increasingly higher levels of Management and technical resources to ensure problem resolution.
Ethical Hacking	Simulated hacking performed at the request of a Customer Agency, under the authority of Enterprise Security.

-N-

Normal Business Hours	Fully staffed operational activity
Notification	A communication to Management at predetermined times to provide awareness of a problem ticket that has been entered into the automated system.

-S-

Service Level Agreement	A document which creates a shared understanding regarding the services provided.
Service Request (SR)	Any type of need from a client that is submitted to DIT, for example, break/fix, application support, upgrades, password resets, purchases, etc. Request for a change in an established process or procedure.
Status	Summary of problem resolution activities for a given ticket to Customers at specific points in time.
Service Providers	The phase in a system life cycle of the continuous performance of normal daily tasks.
System Availability	Total time system is available to agency, minus scheduled downtime.
